1 A composable framework for secure multi-modal access to internet devices
Steven J. Ross, Jason L. Hill, Michael Y. Chen, Anthony D. Joseph, David E
October 2002 **Mobile Networks and Applications**, Volume 7 Issue 5
Publisher: Kluwer Academic Publishers
Full text available: 🗎 pdf(340.33 Additional Information: full citation,
KB) index terms

The Post-PC revolution is bringing information access to a wide range of
desktop, such as public kiosks, and mobile devices like cellular telephon
vehicle telematics. However, existing deployed Internet services are gea
interface of private desktop computers. We propose the use of an infras
architecture to bridge the gap between the capabilities of Post-PC devic
Internet ser ...
